

# ML 101D

Flat Press Creasing  
Die Cutting Machine (Heavy Duty)

平压压痕切线机

## 主要结构特点

1. 机身采用优质材料整体铸造,强度高。
2. 采用3轴斜齿轮结构运行平稳、压切力大、噪声低。
3. 单片式电磁离合器动作灵敏可靠。
4. 操作高度布置合理,压架打开角度大。
5. 电器系统按IEC标准设计。
6. 有单张压切、连续压切、打开延时范围可调。
7. 安全防护系统可靠。
8. 精密的微调装置。

## MAJOR CONSTRUCTION FEATURES

1. High strength due to whole body casting with high quality material.
2. Smooth running, high working pressure and low noise with 3-step helical gear mechanism.
3. Single plate electromagnetic clutch is sensitive and reliable.
4. Operational altitude is reasonably arranged, moving-bed opens to its maximum.
5. Electrical system is designed in conformity with IEC standard.
6. Single, continuous operation and opening delay are available, delay range adjustable.
7. Reliable safety system.
8. High precision micro adjustment device.
