

600SF Double-sided tape sticking machine for Collapsible box wings

The machine is used to sticking double sided tape on the wings of collapsible box. The conveyor belt has the vacuum which can sucked the wing moving without deviation. The sensor positioning system can detect the wings during the moving. The taping device stick the strip tape and square/triangle tape on the wings separately according to the sensor signals. Finally, it will be pressed and flattened by the roller.

Main technical parameter:

Wing size	Max. 200*800mm, Min. 40*100mm
Tape size	Max. 170*170mm, Min. 30*30mm
Conveyor belt speed	12-24m/min
Production Speed	40-70pcs/hour
Power	2KW/AC220V
Machine dimension	2200*900*1600mm
Machine weight	400kg

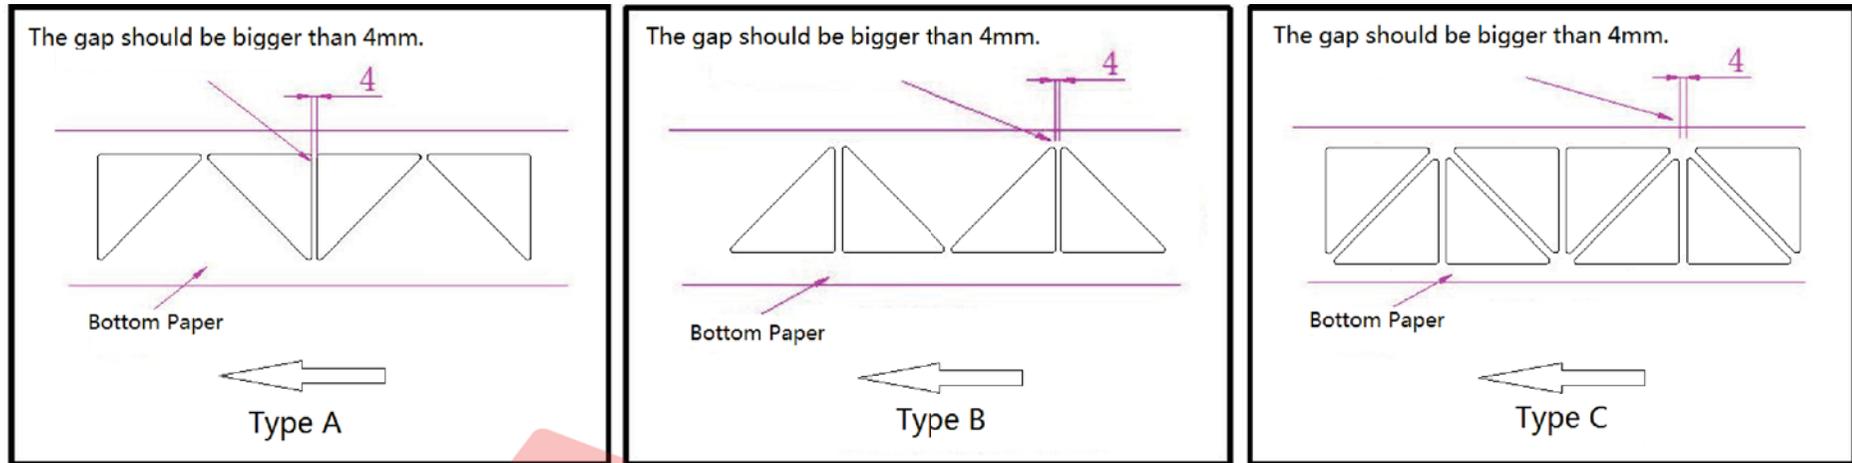

Sticking types:

1. Type A: two triangle double sided tape + strip double sided tape
2. Type B: two triangle double sided tape+ strip double sided tape
3. Type C: four triangle double sided adhesive tape (two triangles symmetric way) + strip double sided tape
4. The triangle function can also work separately, long double-sided adhesive tape can also work separately, the two functions do not interfere with each other. It can be used independently

Die cutting formats of tape
