

QJ80A Angle cutter

This machine can be used to cut beveled corners, rounded corners, and sunflower corners, and it is a supporting equipment for cover machines. It adopts cylinder drive, foot switch control, super large stacking platform, and safety cover, which makes the corner cutting operation safer, easier and more humanized.

Main Technical Parameter:

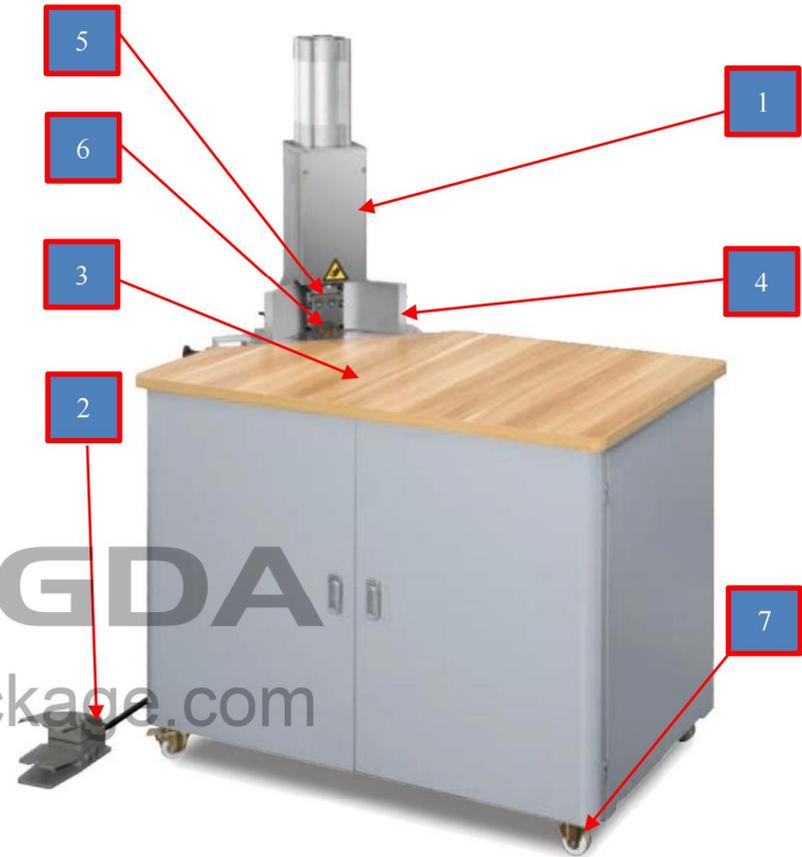

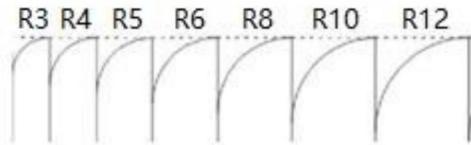

Paper Stacking Height	80 mm
Cutting length	<65mm
Work Table	680*1030mm
Air Supply	0.6Mpa
Power	220V 1P 50Hz
Machine weight	125 kg
Machine dimension	L1030×W680×H1680mm

Production flow:

Features:

- 1. Safety cover: The cover completely covers the cutter and moving parts to ensure the safety of the operator.
- 2. Foot switch: Free your hands, make the operation faster.
- 3. Super large stacking table: 680x1030mm, easier handling large-size paper.
- 4. Center synchronous adjustment: to improve accuracy, saving adjustment time.
- 5. Pressing block: it will hold the material steadily without moving when the knife is cutting.
- 6. Knife: HHS material, it can be customized round corner knife and special shape knife.
- 7. Removable casters: it can be moved to the designated area when in use.
